

## CL200 Passage Handle

The **CaviLock CL200** is a residential range of **Passage** and **Privacy** handles suitable for cavity and surface sliding doors (33 - 40mm thick). When fitted to a cavity sliding door the CL200 allows the door to slide completely back inside the cavity, with the edge of the door finishing flush with the face of the pocket.

The front clashing plate on the **CL200 Passage** set incorporates a recessed edge pull to allow the door to be withdrawn from the cavity pocket, when fully open. The CL200's deep recessed side pulls make even heavy doors easy to slide.

## CL200 Privacy Handle

The **CaviLock CL200** is a residential range of **Passage** and **Privacy** handles suitable for cavity and surface sliding doors (33 - 40mm thick). When fitted to a cavity sliding door, the CL200 allows the door to slide completely back inside the cavity, with the edge of the door finishing flush with the face of the pocket.

The **CL200 Privacy** set is the latching version of the CL200. It has the same look and dimensions as the **CL200 Passage**, with the addition of latching/privacy functions. This is an ideal handle for sliding doors in **toilets, bathrooms** and **en suites, serveries**, and as a **latching handle for double doors**. It is not recommended the CL200 Privacy be used in commercial situations. This handle does not comply with disabled egress requirements.

### Dimensions

### Handles & locks for sliding doors

The CL200 Privacy set can be configured to either **manual latching** or **auto latching** (door automatically latches when closed), which requires on-site configuration.

All components and instructions are included to allow the installer to configure the handle for auto latching.

**CONFIGURATION A**  
Privacy with Right Hand Snib  
or  
Snib / Emergency (option when fitting)

**CONFIGURATION B**  
Privacy with Right Hand Snib  
and  
Left Hand Blank

**CONFIGURATION C**  
Privacy with Left Hand Snib  
and  
Right Hand Blank

**CONFIGURATION E**  
Passage with Striker  
(a mating partner for bi-parting doors,  
to match the Privacy A, B or C Configurations) -  
Both Sides Blank

**Note: Configuration B and C not recommended in single access situation as there is no emergency release function on this handle.**

### Finish Options

### How to Specify

**CaviLock CL200 + Configuration (A, B, C or E) + Finish**

E.g. CL200 Privacy with a privacy snib on both sides, in satin chrome, would be specified as: **CaviLock CL200A1010**
